

ARSAFETY

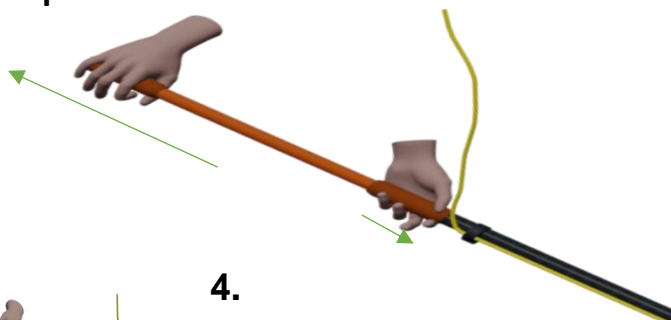

MARINE RESCUE SYSTEM

Instruction for use

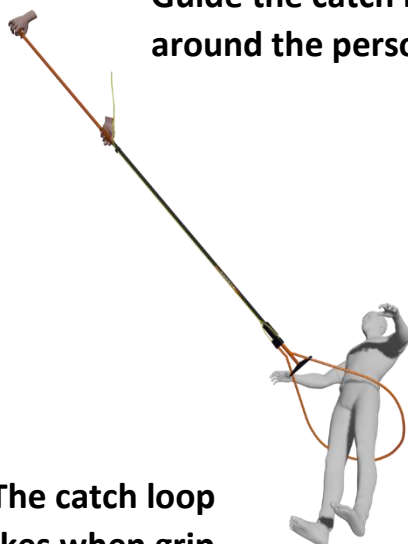

1. Pull out the ARHoop that is ready for use in the bag

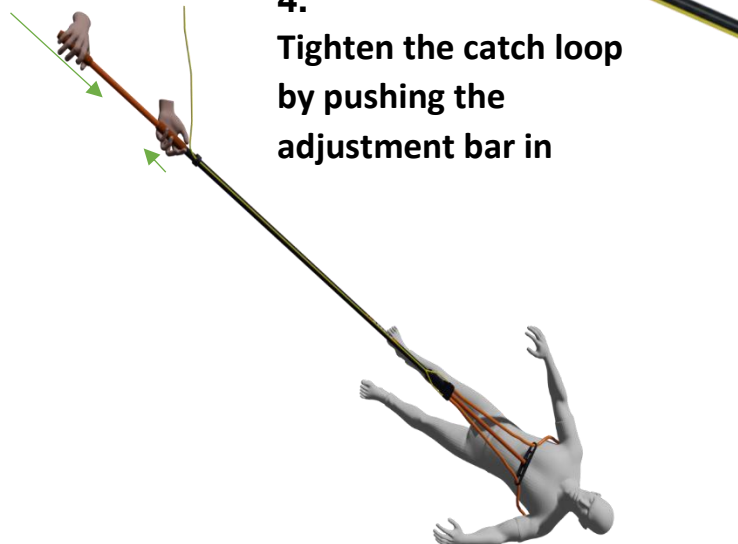

2. Grab both handles and pull the adjusting rod out to get a large catch loop

3. Guide the catch loop around the person

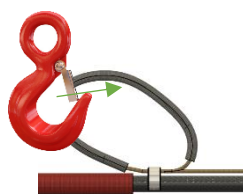

4. Tighten the catch loop by pushing the adjustment bar in

5. The catch loop brakes when grip is released. The person can be hoisted up

5b. Use of external hoisting arrangement:
Connect through lifting gear eye.

6. The catch loop is slackened out by pushing in the adjustment rod while holding the guide tube
